D. TIMELINES

1. Prior to the closing time for receipt of scheduled bids

A bid may be withdrawn at any time prior to the scheduled closing time for receipt of bids, provided a request in writing, executed by the bidder or his duly authorized representative, is filed with the Parish prior to that time. When such a request is received, the bid will be returned to the bidder unopened. However, no bid can be modified, corrected or withdrawn after the time set for closing such bid, except as provided by LSA-R.S. 38:2214(C) & (D).

The Parish, its engineers, architects or anyone distributing plans and specifications for Parish public work projects, equal to or over the contract limit as defined in LA-R.S. 38:2212, shall furnish all prime bidders who request bid documents and who are properly licensed by the Louisiana State Licensing Board for Contractors with at least one set of complete bid documents. A deposit or fee may be charged on the documents as authorized by LA-R.S. 38:2212.

Addenda may be issued, as authorized by LA-R.S. 38:2212 (O). All formal Addenda require written acknowledgment on the bid form by the bidder. Failure to acknowledge an Addendum on the bid form shall cause the bid to be rejected. Jefferson Parish reserves the right to award the bid to the next lowest responsive and responsible bidder in this event.

Prior to submitting a bid each bidder shall visit the site of the proposed work and fully acquaint himself with all surface and subsurface conditions as they may exist so that he may fully understand the facilities, difficulties, and restrictions attending the execution of the work under this Contract. Bidders shall also thoroughly examine and be familiar with Drawings, Specifications, and Contract Documents. The failure or omission of any bidder to receive or examine any form, instrument, drawing, or document or to visit the site and acquaint himself with conditions there existing, shall in no way relieve any bidder from any obligation with respect to

his bid and the responsibility in the premises rests with him. Submission of a bid shall be considered prima facie evidence that the bidder has made such examination and is satisfied as to the conditions to be encountered in performing the work and as to requirements of the plans, project specifications, Resolution No. 141125, as amended, and contract forms.

Any pre-bid test and boring data in connection with subsurface conditions which have been completed by the Parish or its engineers and furnished to the bidder shall not be considered as fully representative of subsurface conditions existing throughout the area tested nor shall they in any way be binding upon the Parish, it being understood that said data is furnished the bidder for his convenience only and the bidder shall be solely responsible for conducting his own boring explorations he deems necessary in preparing his bid. Any prospective bidder wishing to conduct boring explorations on Parish property must obtain written permission from Jefferson Parish prior to such explorations.

No claims shall be made against the Parish for additional compensation due to unforeseen subsurface conditions arising during progress of the work and which might be in variance with the Parish's pre-bid boring data.

2. Post-closing time for receipt of scheduled bids

Except as where provided by law, bidder agrees that this bid shall be legally binding and may not be withdrawn for a period of forty-five (45) calendar days after the scheduled closing time for receiving bids. In the event the Parish issues the Letter of Award (copy of adopted resolution awarding bid by Jefferson Parish Council) during this period, the bid accepted shall continue to remain binding pending execution of the Contract.

Bidder agrees to execute the ensuing Contract and will deliver applicable Bonds to secure the faithful performance thereof.

The Parish of Jefferson reserves the right to cancel this contract for convenience by issuing a thirty (30) day written notice to contractor.

PERVIOUS CONCRETE WALKS & DRIVES
(or approved equal)

DESCRIPTION:

This work consists of furnishing all plant, equipment, labor and materials required for the construction of patterned, colored, pervious concrete ornamental sidewalks, pervious concrete drives, and pervious concrete parking areas in accordance with the lines and grades shown in the plans or established in the field by the Engineer. Work shall conform to all requirements of ACI 522.1-13, ‘Specification for Pervious Concrete Pavement, published by the American Concrete Institute, except as modified herein. When applicable, work shall be performed in accordance with the provisions of Section 706 of the Louisiana Standard of the Specifications for Roads and Bridges, 2006 Edition (Blue Book), and latest revisions, except as otherwise noted in these specifications.

Bid Specifications for Bid No. 50-00143103

MATERIALS:

The pervious concrete used for sidewalks and driveways shall comply with the mixture proportions specified herein.

Mixture Proportioning:

For driveways, the total cement content shall be a minimum of 630 lbs. /CY.

Fly Ash shall not exceed 20% and Slag shall not exceed a 50% maximum.

The maximum water-cement ratio for this product shall be 0.35.

The bulk volume of aggregate per cubic yard shall be equal to 27 cubic feet when calculated from dry rodded density (unit weight) determined in accordance with ASTM C29. Fine aggregate, if used, should not exceed three (3) cubic feet and shall be included in the total aggregate volume.

Admixtures shall be used in accordance with manufacturer's recommendations.

The quantity of water used in the previous concrete mixture shall facilitate placing, compaction, and finishing to the desired surface characteristics. The appropriate water content will give the mix a wet metallic sheen without causing the cement to flow from the aggregate and be sufficient for adequate hydration. If the water content is too low, the mix may be inconsistent and produce poor bond strength. A high water content may cause the cement to migrate toward the bottom and fill the voids as well as create a poor surface bond.

Testing shall be in accordance with ACI 522.1-13 Section 1.5.
