COMMENTS AND QUESTIONS

1. Can you confirm that we will be going back with 3" for areas to be milled and overlaid?

The restoration of the roadway shall be in accordance with Standard Detail 801-01. Asphaltic concrete pavement shall be replaced with full depth asphalt consisting of a minimum 7" thickness of mix type B base course and 2" thickness of wearing course for City/Parish streets in accordance with the specifications. Additional asphalt shall be used as required to restore the roadway back to the existing conditions.

2. How will the asphalt at the trench line be paid? Will the thickness be 7" base and 2" wearing?

Measurement and payment for the asphalt replacement shall be in accordance with Standard Detail 801-01 and the Specifications. Asphalt used to replace the base course and the surfacing will be paid per ton under Item No. 1151100 Asphaltic Concrete Pavement. Pay Item No. 2020500 has been added to account for the removal of the asphalt pavement and base that extends beyond the 3" removal from the milling.

3. If all the asphalt gets paid under item 1151100, then what will item 1151300 be used for?

Item no 1151300 is intended for the pavement work required to relocate drainage structure B-1 as shown on Sheet C-1. This work is located outside the limits of the milling and overlay work and will be paid separately.
